

FLEET TRACKING SOLUTION

All-in-One Solution

Our unique fleet management system combines the capabilities of our flexible CTM-ONE wireless gateway together with our Cypress VUE platform to track assets, monitor data and generate reports.

This full-stack solution has become the go-to for several businesses due to its ease of use as well as its ability to integrate with existing customer applications.

Cypress VUE

Cypress VUE is a web-based software solution capable of tracking, storing and reporting the movement and actions of vehicles and other sensor equipment in real-time. Its user-friendly interface provides data in both map and textual formats.

Trackable Assets

Snowplows /
Salt Trucks

Graders

Light Duty /
Pickup

Garbage /
Recycling

Emergency
Responders

Vector Trucks

Street
Sweepers

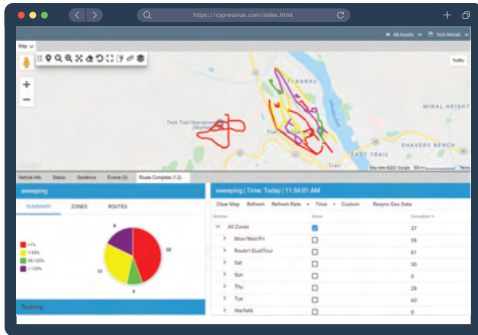

Bucket
Trucks

Create Custom Reports

Create custom reports to suit every aspect of your fleet needs. Gain key insights into your fleet operations and its associated costs to improve performance results. Analyze total salt usage, plowing or spreading efficiency and other custom reports.

FLEET TRACKING SOLUTION

Key Features

- Map out and track route completion
- Customizable dashboarding for effortless data visualization
- Advanced reporting tool for important vehicle parameters
- Create and edit geofences to monitor and control assets
- Real-time vehicle diagnostics and instant alerts
- Dash camera integration for live street view

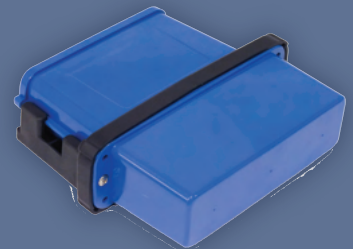

CTM-ONE Wireless Gateway

CTM-ONE Blade

CTM-ONE with Cable Cover

CTM-ONE Wireless Gateway

The CTM-ONE is built with a variety of data interfaces, advanced power management and GNSS. The wireless gateway can be customized and built to fit your exact business needs. The CTM-ONE has internal antennas and an optional cable cover that provides an extra level of protection. Users can reduce installation time by using a single wire hookup for compatible CAN Bus systems.

CTM-ONE Blade tow plow install

Cypress Solutions also offers an alternate housing for external vehicle installations, with a fully sealed and weatherproof design.

It includes all the same hardware and functions as the regular CTM-ONE and features a discreet grey colour to blend in on vehicles.

CTM-ONE salt truck install

Reliably track, monitor and control assets to improve productivity and fleet safety in one single platform.
