

FLEET TRACKING SOLUTION WASTE MANAGEMENT

All-in-One Solution

Our unique fleet management system combines the capabilities of our flexible CTM-ONE wireless gateway together with our Cypress VUE platform to track assets, monitor data and generate reports.

This full-stack solution has become the go-to for many municipalities due to its ease of use as well as its ability to integrate with existing customer applications and various waste management vehicles.

Cypress VUE

Cypress VUE is a web-based software solution capable of tracking, storing and reporting the movement and actions of vehicles and other sensor equipment in real-time. Its user-friendly interface provides data in both map and textual formats.

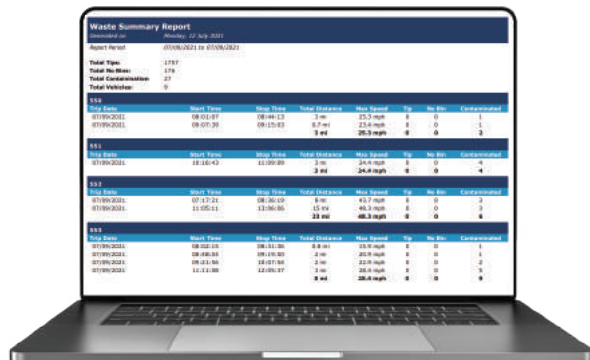

Key Features

- Create and edit geofences to monitor and control assets
- Customizable dashboarding for effortless data visualization
- Advanced reporting tool for important vehicle parameters
- Map out and track route completion
- Real-time vehicle diagnostics and instant alerts
- Dash camera integration for live street view

Waste Summary Reports

Create custom waste summary reports to track the performance of your waste management fleet. Gain key insights into your fleet operations to improve operating efficiency. Track key waste collection parameters including total distance traveled, max speed, number of bin tips and number of "no bins". Reports are specific to exact dates and times to help track the amount of work done in a certain period.

FLEET TRACKING SOLUTION WASTE MANAGEMENT

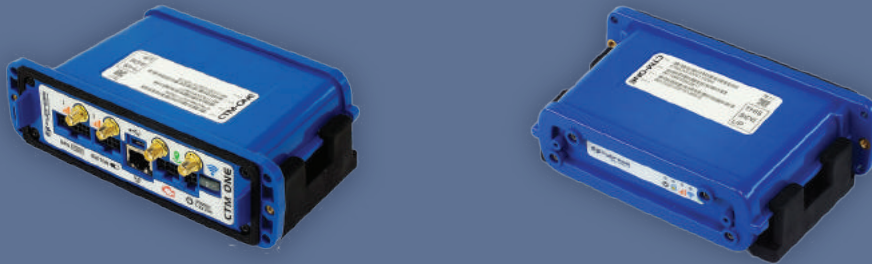

Example of No Bin photo

Camera Application

- A unique camera installed on waste collection vehicles
- Drivers can snap photos quickly to record events
- Photos are time stamped and geotagged for records
- Photos are plotted on Cypress VUE for review at any time
- Document cases where bins are visually contaminated, filled past capacity or where no bin has been left out

CTM-ONE Wireless Gateway

CTM-ONE Wireless Gateway

The CTM-ONE is built with a variety of data interfaces, advanced power management and GNSS. The wireless gateway can be customized and built to fit your exact business needs. The CTM-ONE has internal antennas and an optional cable cover that provides an extra level of protection. Users can reduce installation time by using a single wire hookup for compatible CAN Bus systems.

Reliably track, monitor and control assets to improve productivity and fleet safety in one single platform.
